

Why should you donate?

Meet The Changemakers

The congress brings together a strong community of activists, innovators and crypto enthusiasts with entrepreneurial mindset. These are the people who are going to bring the change we all strive for!

Help Us Make the World Freer

In the era of global surveillance and an increasing trend of restricting our liberties, cryptotechnologies play their distinctive role as the counter force to this trend. Proliferation of decentralized technologies inevitably increases freedom of all people.

Step Forward to Paralelní Polis

Being a donor has its perks as we offer a great chance to discover the parallel world of new technologies. Our donors can look forward to interesting workshops on 3D printing, digital privacy, or blockchain & Bitcoin which can serve also as teambuilding activities. We also offer 1 day rental of our Institute for free, or customized polargraph drawings.

HCPP Sponsorship Packages

We prefer donations in bitcoins, but accept EUR or CZK too. Perks from the packages can be combined based on individual agreement.

CYPHERPUNK 1500 EUR
Workshop of your selection
1 day rent of the conference room
Logo on the HCPP Web
Polargraph Drawing
5x Tickets, Bitcoin Cards & T-shirts

We look forward seeing you in Prague!

Hackers Congress Paralelní Polis

Since 2014, Hackers Congress Paralelní Polis is one of the premier events for hackers, artists, activists, libertarians, and cryptoenthusiasts in Europe. Its main goal is to celebrate the new era of digital freedom and cryptotechnologies. The congress aims to promote the most recent trends and events from the wide variety of fields such as art, science, cryptotechnologies, decentralized economy, and hacktivism.

The 2016 HCPP is expected to unite more than 40 speakers and over 400 attendants complete with academics, tech entrepreneurs, journalists, students, and decentralized economy fans from dozens of countries. Moreover, prior the congress there will be a two-day long warm-up event, TREZOR Hackathon organized by Satoshi Labs, where dozens of hackers will be mentored by Bitcoin guru Andreas Antonopoulos.

Paralelní Polis

Paralelní Polis is a one-of-a-kind nonprofit organization that brings together art, social sciences, and modern technologies. The ideas of liberty, independency, and innovative thinking and development of society are the main underlying foundations the whole project is built upon.

The project intends to remain state free as it operates entirely without support from the government, and most of the funds come from voluntary contributions of our donors and partly from commercial activities such as running a unique co-working space and the world's first bitcoin-only cafe.

It was founded by members of a contemporary art group Ztohoven, and Slovak and Czech hacker-spaces. Its main goal is to promote economic, social and digital freedom. We aim to be a vocal voice of freedom in order to shape the public discourse, and ultimately works towards a freer future.
